New, easy-to-use source book on paint specifications, surface preparation and coatings application!

PAINTS & COATINGS Handbook

by Abel Banov, prominent journalist in the paint and coatings field.

400 pages, 6⅛" x 9¼"
Hardcover, $20.00

This book has been designed primarily to aid Architects, Builders, Prime Contractors, Industrial Maintenance Engineers and others in specifying proper coatings for low cost, long life, surface protection and performance.

The text supplies detailed information to assist readers in understanding surface preparation, application, and type of coating to use for a given job.

A valuable Appendix details 76 specifications, including 60 Federal, in easy-to-understand charts and puts these specifications side by side in Performance Characteristic Charts so the specifier can select the best coating for his purpose at a glance.

Chapters include: What Makes a Coating Work • What Goes in a Coating • Testing • Surface Preparation • Caulks and Sealants • Application of Coatings • Deterioration of Coatings • Selection and Specification for Exterior Surfaces • Selection and Specification for Interior Surfaces • Fire Retardant Coatings • Economics of Structural Coatings • Two appendices which permit you to easily select and specify a coating for a particular purpose without reading the entire text.

Fully illustrated and indexed.
